Kettleworks

Preventive maintenance subscriptions for commercial coffee equipment

The problem

A broken espresso machine costs a busy cafe about $1,800 a day in lost sales.

The average repair callout takes 4 days to arrive.

Most cafes have no maintenance plan at all — they call someone when it breaks.

What we sell

Maintenance as a subscription, not an emergency

One flat monthly subscription per location. Quarterly preventive service, parts included.

A rules-based scheduling engine assigns technicians by machine age, model, and service history.

Emergency callouts for subscribers answered within 24 hours.

Traction

Annual recurring revenue: $1.2M.

210 subscribed locations across 3 metros.

Revenue growing 11% month over month for the last 6 months.

Unit economics

Gross margin: 38%.

Customer acquisition cost: $940 per location.

CAC payback: 14 months.

Monthly churn: 4.5% of locations.

Market

63,000 coffee shops in the US.

Serviceable market for equipment maintenance: $410M per year.

No national player — the trade is local repair shops and manufacturer warranties.

Team

12 people: 7 field technicians, 3 engineering, 2 operations.

Founded by Dana Okafor (10 years in food-service equipment leasing) and Priya Menon (ex fleet-logistics software).

The ask

Raising a $2.5M seed round.

Gets us to 600 locations and 3 new metros in 18 months.

Primary use of funds: technician hiring and route density.
